Thread Sizes:

1/4 -27 IP measures 1/4" diameter and is the thread size used on the tops of harps. Finials are usually tapped 1/4 -27 IP, but are also available in 1/8 IP.
 1/8 IP measures 3/8" in diameter and is the thread size that fits into ordinary lamp sockets.
REMEMBER that 1/8 is a LARGE hole and 1/4 -27 is a SMALL hole.

Lamp Parts

Cross Bars and Hickeys

- 800-3200UNF3 7/8" Steel tap 1/8 IP
- 800-3201UNF5 7/8" Steel tap 1/8 IP

Brass Rings

- 800-8050 Brass Ring for 2 1/4" Holder
- 800-8051 Brass Ring for 3 1/4" Holder
- 800-8052 Brass Ring for 4" Holder
- 800-80535 Sided Brass Ring for 2 1/4" Holder - each side is approximately 1 3/4"

Note: A vase cap must be tinned before you can apply a patina. It is better to tin a cap before applying it to a lamp as it requires a lot of heat which could transfer to the glass and cause breakage. To tin a cap first wash it well and dry it, then apply flux and heat the cap starting at the top. When the cap is hot apply a small amount of solder and let it flow evenly over the cap - repeat until completely covered with solder - wash well and install it on the lamp.
